

SHWE OAK (HTET THU WIN)

FIRST HTML PAGE

FILE SYSTEM: FILE (👤)

- ▶ Store data
- ▶ Many different file types
 - ▶ Example: word file, pdf file, exe file, html file, etc...
- ▶ Naming convention: [filename][dot][extension]
 - ▶ Extension is the acronym of file type
 - ▶ Example: cv.doc (word file), cv.pdf (pdf file)
- ▶ HTML extension: html, htm
 - ▶ Example: index.html

FILE SYSTEM: FILE (📁) NAMING CONVENTIONS

- ▶ Should be consistent and descriptive
- ▶ A good format for date designations is YYYYMMDD or YYMMDD. This format makes sure all of your files stay in chronological order, even over the span of many years.
- ▶ Do not use special characters such as ~ ! @ # \$ % ^ & * () ` ; < > ? , [] { } ' " and |. You can use underscore(_), dash(-), and dot(.)
- ▶ Use leading zeros for clarity and sorting in sequential order when using sequential numbering system. For example, use "001, 002, ...010, 011 ... 100, 101, etc." instead of "1, 2, ...10, 11 ... 100, 101, etc."

FILE SYSTEM: FILE (📁) NAMING CONVENTIONS

- ▶ Do not use spaces as space will not work in browser address bar and in some applications.
- ▶ Use all lowercase file name

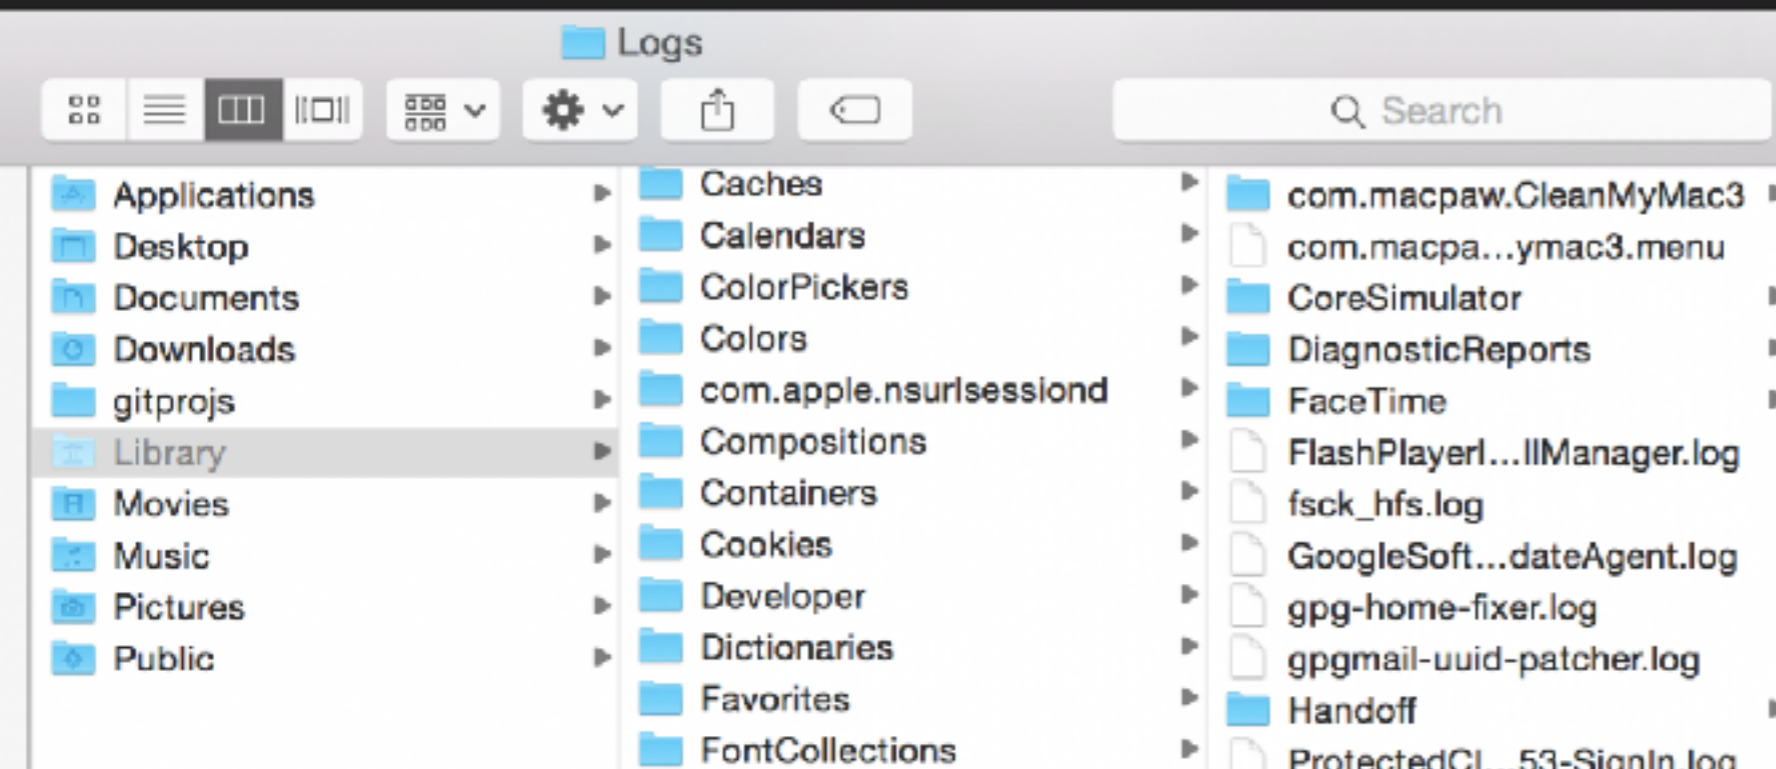

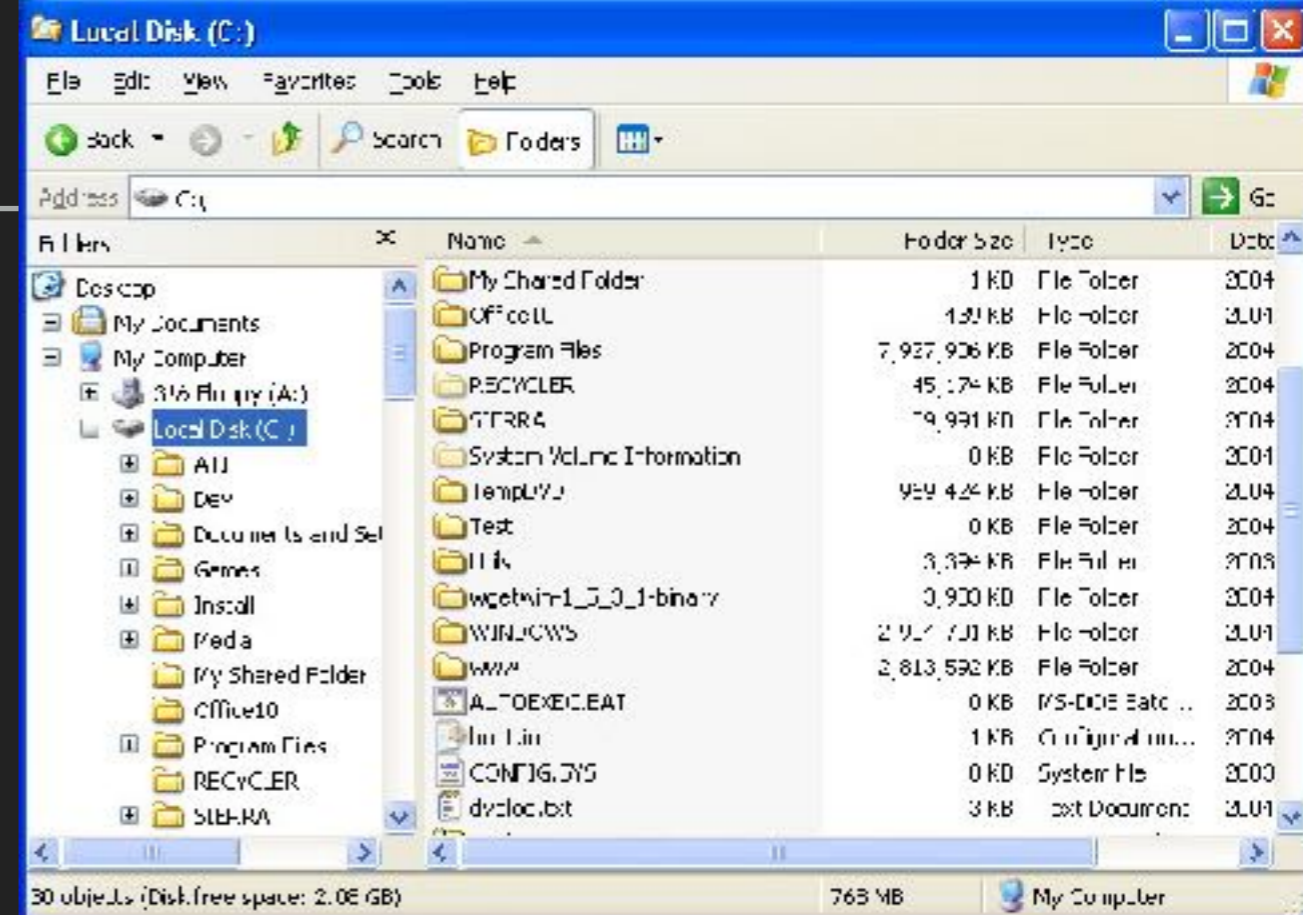

BASIC RULES (အခြေခံ စည်းမျဉ်းများ)

- ▶ RULE 1: All html files must have extension 'html' or 'htm'. 'html' extension is prefer one.
- ▶ RULE 2: First html file in the website project folder must be named 'index.html'.
 - ▶ By default, the web server will always load index.html file if no file is specify in the web address bar.
 - ▶ Example: <http://www.facebook.com> will load the index.html file under the web directory.

TEXT

FILE SYSTEM: FOLDER (ဖိုင်တွဲ)

- ▶ Also known as directory
- ▶ Organize files
- ▶ Can be nested

ACCESSING A FILE FROM BROWSER

- ▶ To view a specific file under a specific folder, you need to type in folder name followed by '/' (repeat the folder name and '/' for nested folders) and file name.
- ▶ Example: If you want to go to 'lunch_menu.html' page under 'menu' folder/directory in <http://example.com> domain, type in...
 - ▶ http://example.com/menu/lunch_menu.html
